What did this instructor do to facilitate my learning within this course?
Avleen Kaur, by far as been the best math professor I have had. She made sure you LEARNED the material and were just not taught to memorize stuff. She made every exam/quiz fair.
Her notes were very clear, detailed and provided good examples. Her expectations of us were fair and clearly laid out.
She was very good at explaining the material, and at the beginning of each class she would recall the material from the previous class to help me understand the new material better.
Instructor Avleen Kaur provided excellent lectures that provided detailed explanations and examples. She spent extra time answering questions before and after classes as well as on piazza and always answered emails regard
She was very friendly and approachable, she gave us lots of extra time to submit our papers after a test or quiz and she was very nice with her marking.
Instructor made great notes and was very available and helpful when answering questions
Good tutorial questions and exams
Did everything she could to make sure students understood the material. In-depth explanations, encouraged student emails, used piazza to answer specific questions from the course.
She did a great job of going over lots of examples with us to make sure we understood the material and what she was looking for on exams and mid terms. She also was always very friendly with us making sure to answer ev
Very detailed notes and lots of examples. Very generous marker
Clear instruction
Provided extra time outside the class for solving problems.Most helpful teacher in UofM
She was very caring with her students by helping us with the topics that were difficult to understand. She also made the material easier to understand.
Provided good notes and recorded lectures
Provided complete notes that covered the material well
The instructor provided a friendly atmosphere which made online learning a pleasant experience.
Provided complete notes that covered the material well
Provide comprehensive notes and recorded lectures. The quizzes also helped a great deal.
She made sure we understand each and every possible way of doing one math, learnibg from the very basic and go through all the problems we have.
The Piazza platform was extremely helpful and the instructor was approachable and easy to contact
very good, she was excellent
Went above and beyond to assure that students understood content, always willing to stay after and provide assistance when required.
She posted amazing notes templates to fill in on my OneNote. But most importantly, this professor is the most accessible professor that I've ever had before. She was constantly available, whenever we would ask questions c
They did a good and thorough job teaching the subject. Explained it all really well.
Very clear notes, made every effort to be available to students and help as much as possible.
Miss Kaur was an incredibly competent and helpful teacher. She was prompt with emails, delivered lectures masterfully and (most importantly) showed a deep passion for all forms of mathematics.
Flexible office hours, lots of practice questions were available and her way of teaching was excellent
Gave clear explanations on how to solve problems and was great at teaching difficult concepts. Also quite often asked if there were any questions during lectures which was very helpful.
She was a great teacher an gave us all material we needed to succeed. From textbook pages to past exams
Really helpful fill-in-the-blank notes that made following in class much easier. Avleen had a passion for teaching and it showed. Her love of math and ensuring her students found success was evident. Extremely helpful when
I thought that using piazza to answer questions was very helpful.
Lots of different options to study and helped guide studying.
Best Video Lectures / Explanations clear ! great tutorial questions , great pace !
The final exam was really fair and the test were fair as well, however the mid terms were both very difficult
The questions given in the quizzes, term tests and final exam were usually similar to what I expected, based on the problems from the textbook which I did for practice. This stands out to me since this is not the case for som
Understanding of the new learning experience and accommodating towards students. Using an iPad to teach the course was also very helpful as the notes could be seen clearly. The instructor did a really good job.
Provided all the lectures and lecture notes on time and she taught us in a way anyone could understand the course material
Avleen went into immense detail and always went over the stuff that was most important the most. She was very helpful during office hours, and also stayed after class for an extra 10-15 minutes to answer student's question
She also set up a Piazza group for us so we could post our questions and she would help us with solutions we couldn't figure out.
Good tutorial questions and exams
Excellent online learning experience, providing necessary information through email and uploading course material in a good timely manner.
Avleen Kaur came and stayed 10 minutes before and after class to answer questions and used piazza to answer any question we had in a very short amount of time. She was clear and concise in clears and shows very easy
Her classes were very organized and easy to follow. Her step-by-step instructions on how to approach a variety of types of questions helped my immensely.
The instructor did an amazing job at showing her understanding of the material and making it easy for students to understand. Her dedication was above and beyond any prof I have dealt with, she answered all questions wit
Very helpful
Great notes/lectures, explained things really well.
Helpful and provided all resources required
Made quizzes applicable to the material and straightforward; was very understanding of technical issues. Very friendly and personable
Slowed down and spent more time on sections of the class that were hard to understand.
Avleen provided very clear lectures and accompanying notes. She was very organized in her communication and I rarely felt unsure about where to get information or find help.
The Piazza forum was answered consistently and quickly.
Additionally,
I reached out to Avleen about 3 weeks before the final explaining how I was having trouble keeping up with the course. She provided me with an organized understanding of what skills I would need to demonstrate on the fina
Used sufficient tools such as a digital writing pad and pencil which is optimal for online teaching as well as provide recorded lectures for students.
In a way you dont even have to read again after listening to her explanation
She provided reasonable expectations and deadlines along with course material and tests that accurately reflected the material taught in class. She also highlighted material that was important for our future engineering career

How might this instructor improve this course
She's doing amazing as is.
Especially with online, I would have liked more office hours at a specific time as her's seemed to move around a lot, making it confusing. I would have also liked more in class examples, as I believe you can never have too m
nothing
Instructor Avleen Kaur does not need to improve the way she taught the course, it was delivered exactly as one would expect and facilitated learning. One might say occasionally 5min overtime on instructing occurred which
Maybe split up the grades a bit more maybe with some assignments so the final is not as heavy.
There is nothing the instructor could improve on
More structured lectures
Watch the way she talks to the class. Sometimes during a test she would say over zoom "this is a very easy test" comments like these I think do not help and make some students feel bad if they are having a hard time. I per
She is best
Keep up the good work
Group the course notes by section, be more patient with the students.
Budget time better so we complete all the course material with some time to study before the exam
Budget time better so we complete all the course material with some time to study before the exam
Organize the course to give some time at the end for a questions and answers class.
.
Avoid comments during quizzes and exams such as "this is easy you should be done by now"
slow down a tiny bit, it was hard to follow/keep up at sometimes
Not sure.
I would consider trying to include more real world examples in the problems that we did. We worked very well learning the theory behind everything, but it was still very abstract in terms of applications. For example we had to
Classes ran late a lot
The only thing I would say is slow down slightly when going over examples in lecture.
idk lol
The lecture itself would move too fast to most students to write down notes and also be able to listen effectively. This caused a lot of students to either rely on the recordings to be able to learn and take notes or watch the lec
It would be helpful for her to slow down to allow to students to take note of what she has written and to better explain her process.
Not quite sure
My only suggestion for improving the course is to be a little bit more mindful of the time. Often examples were started right at 9:19 Or 9:20 and the class would end up running overtime. I know we didn't have to run across ca
Kinda came off condescending in the beginning but later on i just realized that she really dislikes cheaters.
I found the notes very hard to follow if you didn't print them off or use a tablet to take notes. I still use a pen and notebook and it was very hard to take clear we notes from the way she had the slides setup. Overall she's a go
She is very good now, I have no idea what she has to improve.
Even though the examples given in the lectures were generally useful, I feel like having some harder examples in the lectures would be even better.
I don't see any improvements required as I feel like the course was taught very well in these unfortunate times.
Avleen was one of the best profs I've ever had. I can't believe she isn't technically a professor. I have never had a good math prof until I took Math 2132 with Avleen. I have no suggestions for improvement because Avleen ex
Another thing that I really appreciated about her teaching style is that she is very good at communicating everything with her students.
More structured lectures
Less review during each class of more simpler course material from previous/current course(s) and replace with more challenging examples.
The class was amazing, I only wish it was in person.
Sometimes a bit more encouragement would be nice to make us feel like all the effort we're putting in is being acknowledged. It wasn't bad but could be improved.
all in all the instructor did a great job, my only complaint was the fast pace of the course but I guess that is how the course is structured
went a bit to fast through some notes, but overall not a huge deal as we could go back and review the notes as needed.
Course was good
Marked assignments to further motivate learning.
Narrow the textbook questions down so that students have time for other course work as well.
Piazza could take a lot of time to keep up with. I'm sure the instructor put the most time in, but potentially some sort of question quality guide would be helpful to differentiate between 'what is the answer to this' and a more c
Have TAs to give more specific feed back when marking test results.
The instructor was perfect I was lucky to be in her class
I would like her to slow down the writing speed of the live lectures, as I was spending too much time copying down notes and not enough time listening to the material
